● *Systems for:*

**ICE-
CREAMS**

**CAKES
BRIOCHES**

SPICES

**ESSENCE
AROM**

CHOCOLAT

COFFEE

● *And special production:*

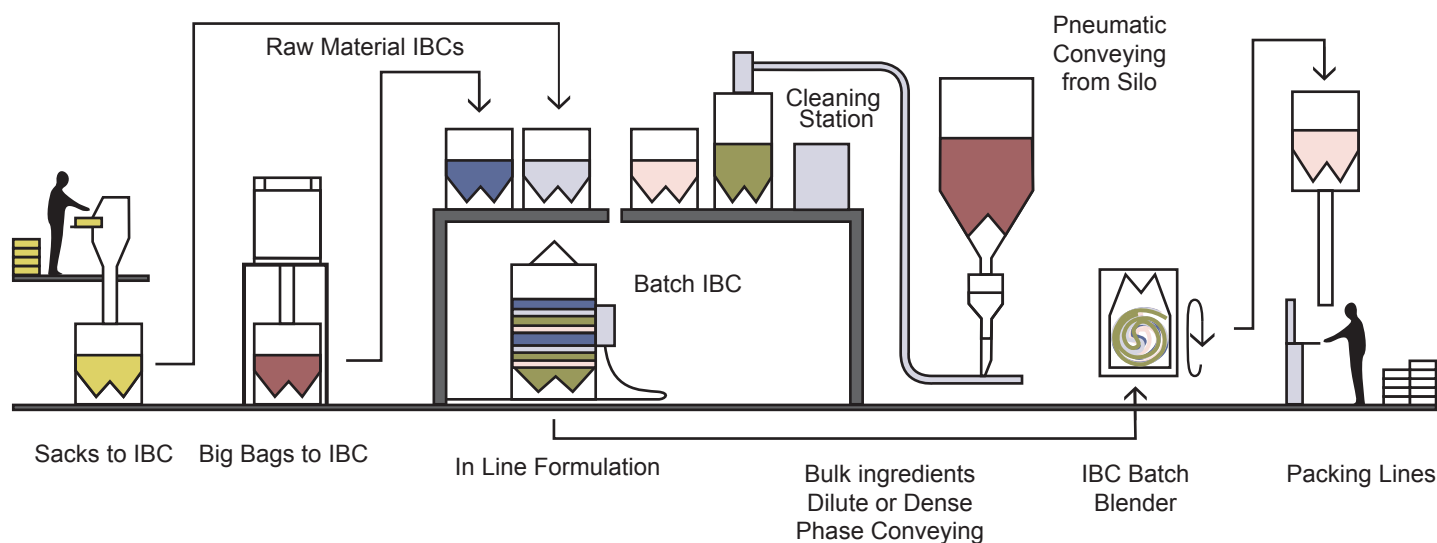

VITAMIN

FLAVOURS

PROBIOTICS

MACROBIOTICS

KOSHER

A total solution for bulk materials handling:
the best mix of solutions, experience and capability

Intermediate Bulk Containers

IBC Discharge Stations

Formulation Systems

IBC Batch Blenders

IBC Filing Systems

Clean - In - Place

Materials Testing

IBC Washing

Integrated Control Systems

Dense Phase Conveying

Dilute Phase Conveying

Switches and Divertes

Pneumatic Blending

Big Bag Handling

Materials Testing

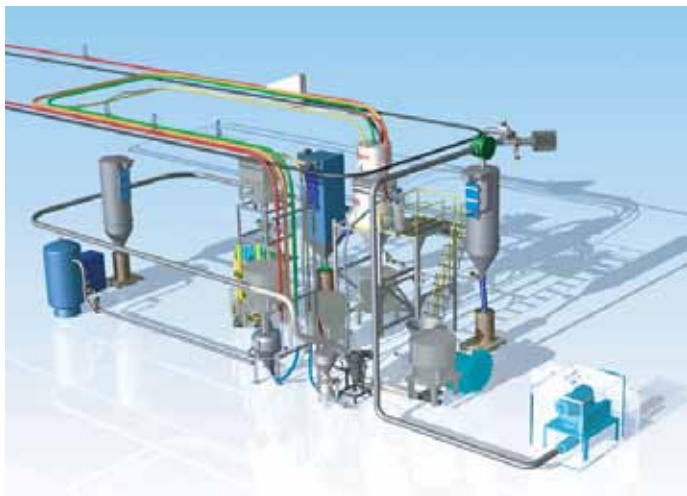

Dust Collection

RESEARCH CENTRE

Nol-Tec has a new Research Centre where several technologies can be tested, such as:

- dense phase pneumatic conveying
- vacuum dense and dilute phase
- pneumatic blending

Furthermore, the Research Centre is equipped with:

- BC container with dosing cone valve
- Bulk bags unloading station

RESEARCH AND INNOVATION

Nol-Tec performs tests of:

- transportability
- degradation
- maximum rate
- segregation

of each product, to avoid problem during the plant start-up. The customer can really check how the product is conveyed. Moreover, the test, gives relevant indications about the correct engineer and control of the conveying system.
